Rapid Prototyping

Bicycle Air Pressure Monitoring System

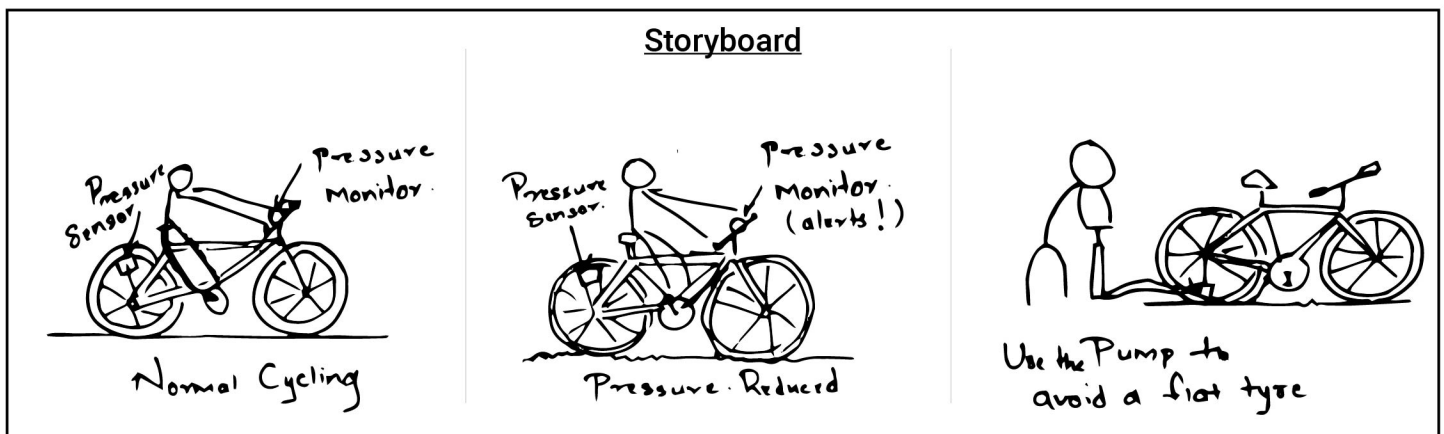

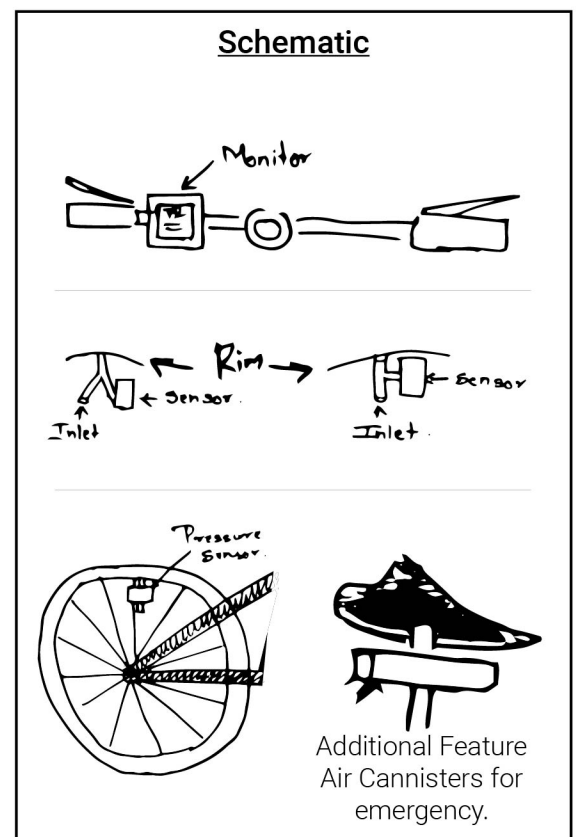

As a part of the Rapid prototyping course at Maker's Asylum, Mumbai we built the Air pressure monitoring system which could give real time updates about the air pressure of the bicycle to the rider on the handlebar and an alarm when the pressure would go below the threshold value.

Team Members:

Rugved Arte
Abhishek Sawant
Prasanna Raut

Role:

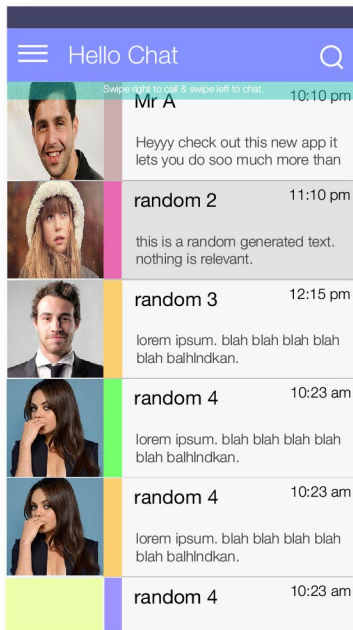

Designing the prototype and building circuitry using Arduino.

UI Design

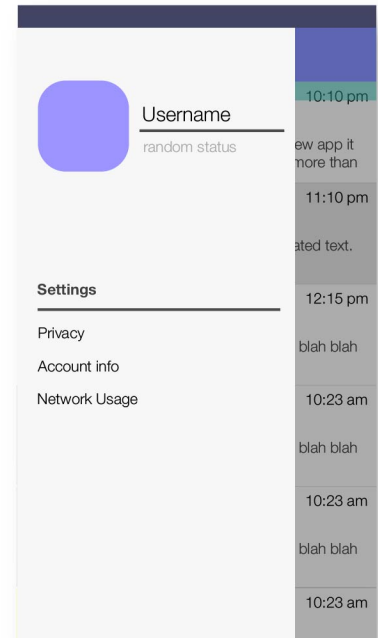

Mobile application UI for a Messenger App

Landing Page. Swipe Right to call
Swipe left to c hat

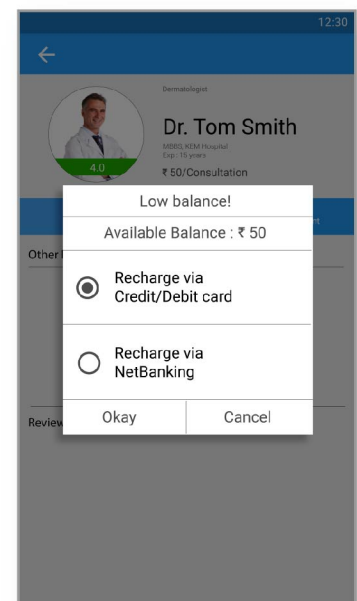

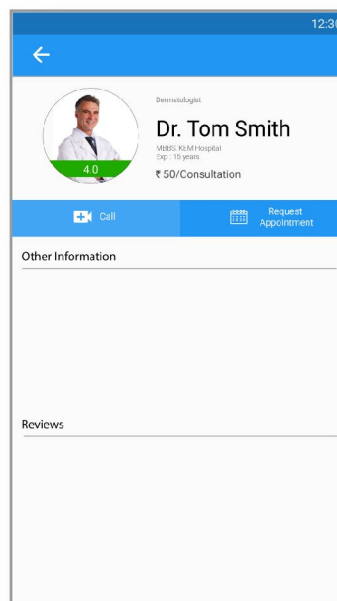

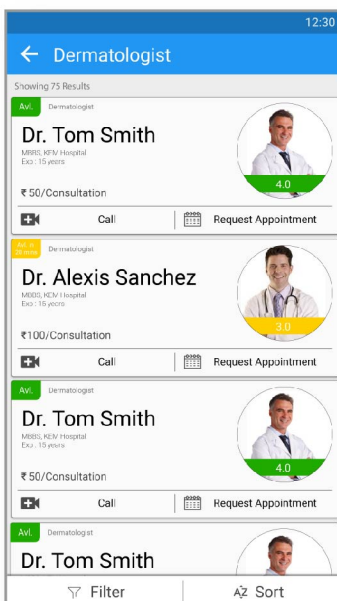

Colored notification bar.
swipe the colored bar to see the chat.
